# SWIVEL

Patient Bedside Furniture

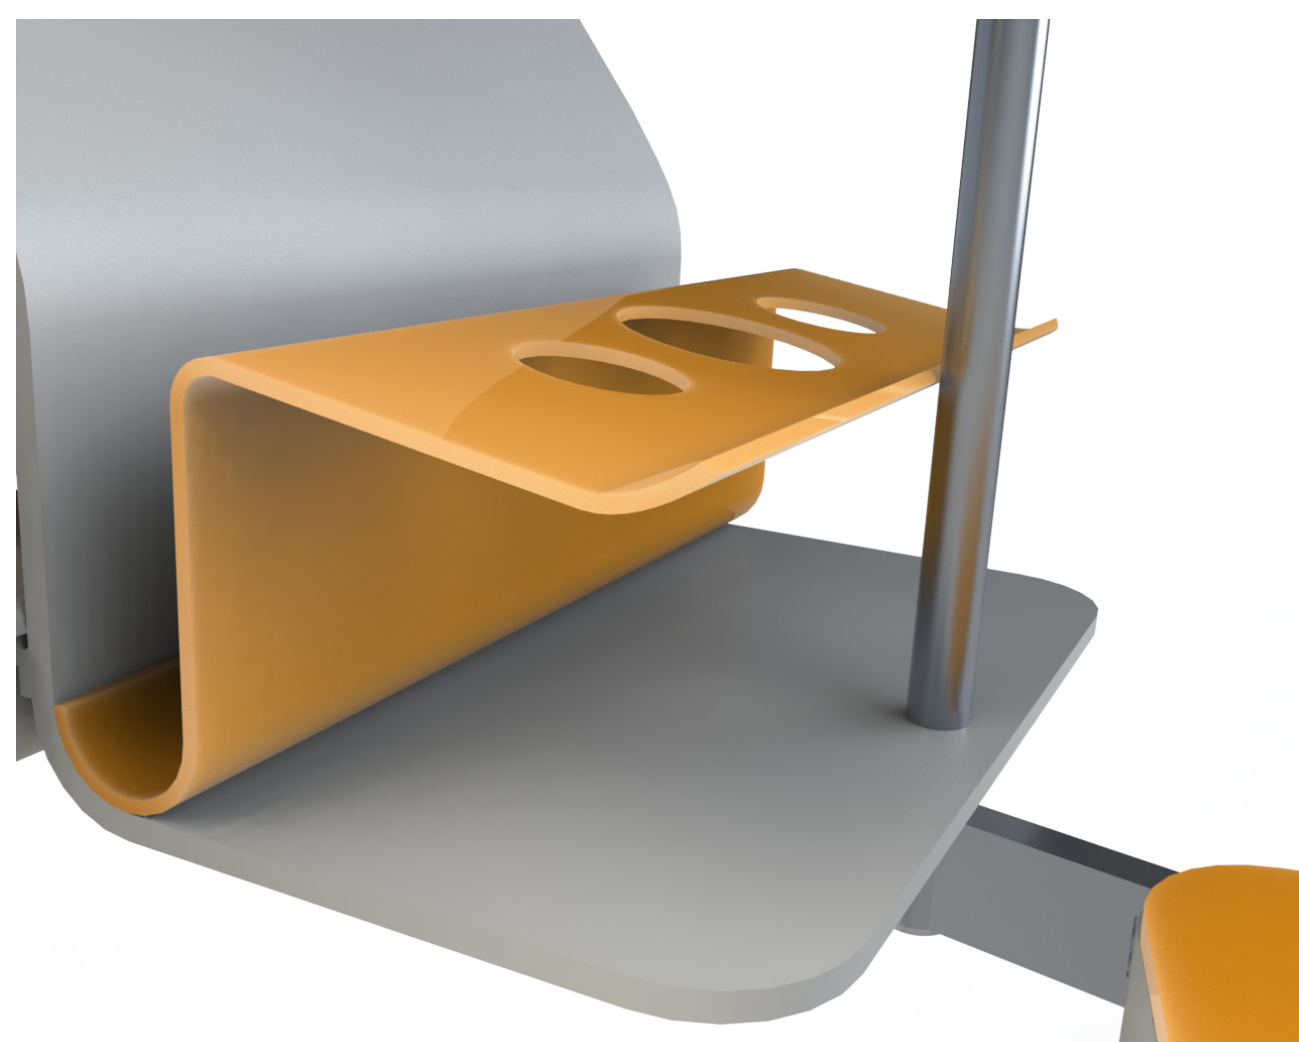

TOP VIEW

Various usage positions

Swivel is a unique and innovative furniture system designed in collaboration with hospital staff and patients.
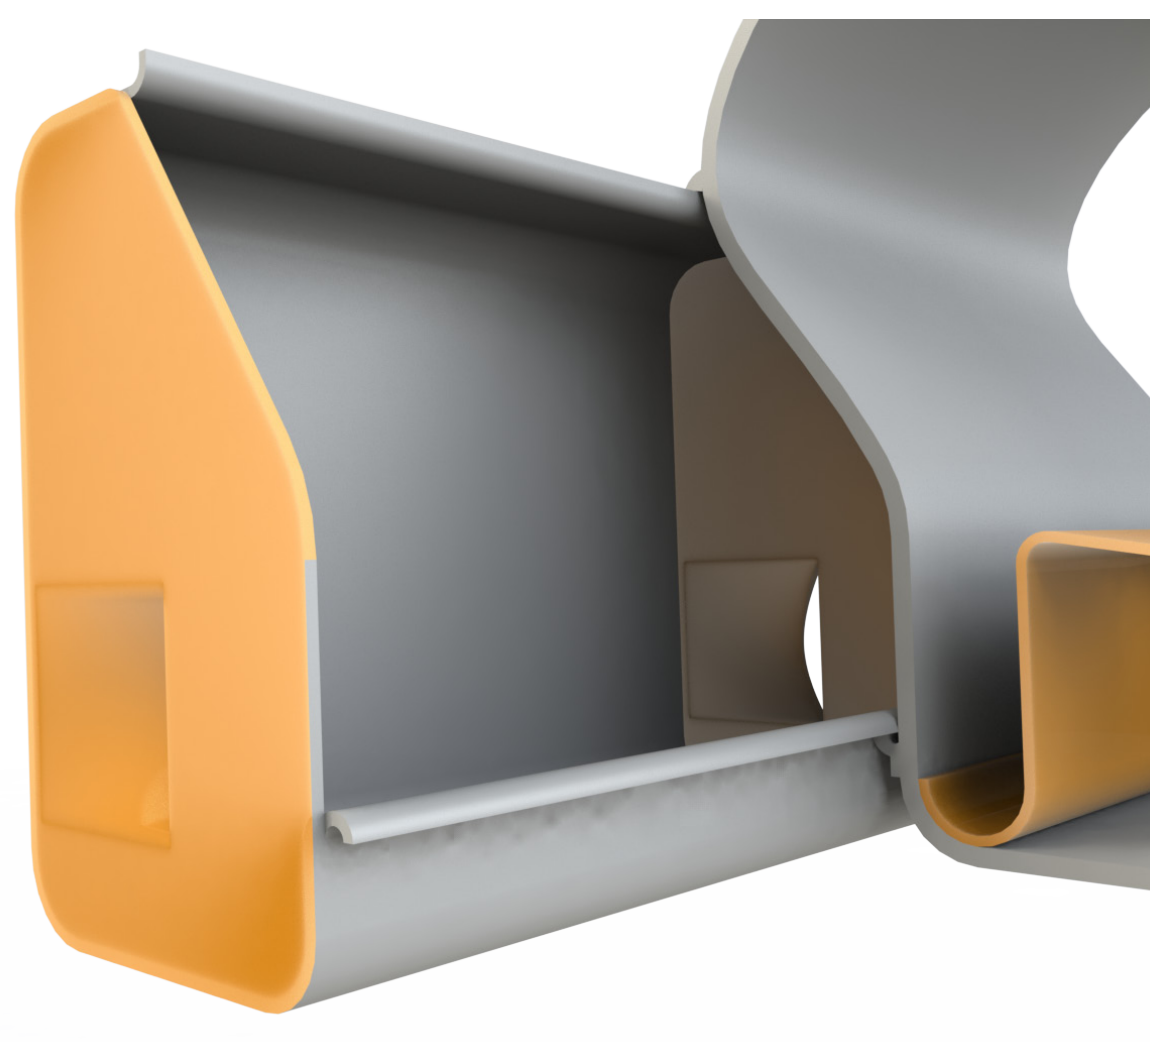

The design demonstrates the future for patient bedside furniture by giving more control, better access and improved privacy to patients within a shared hospital room.

Swivel is easy to clean and can be maneuvered from the bed without the help of others.
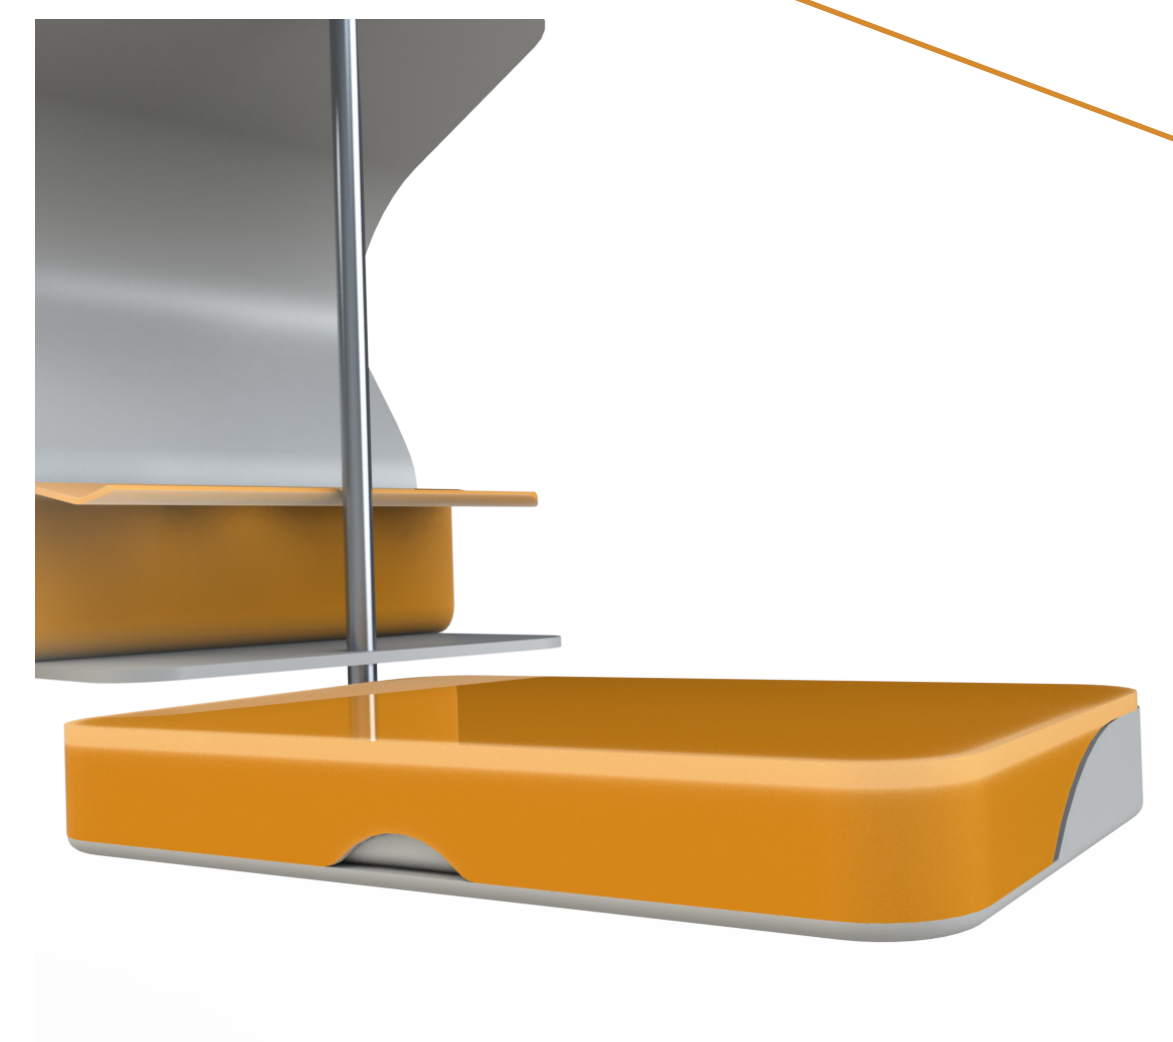

**Removable shelf for holding cups, bottles and magazines**

Easy to access storage

Lockable tray table with reading light, power and USB sockets inside
